Personal Site

PROFILE

Full stack Software Engineer with experience in tailoring solutions using JavaScript and native Object Oriented Programming languages. Able to address diverse business challenges and translate requirements into technical specifications. Skilled at implementing customised solution into existing system. I'm eager to tackle greater-scale projects to further develop my expertise and provide positive impact to the team.

WORK EXPERIENCE

Associated Developer
Nov 2022 – Present
Yoox Net-A-Porter Group, London

- Revised our customised promotion code features, allowing our agent to personalise deals and discounts for high spending customers on Salesforce platform
- Introduced performance monitoring metrics into casework, tracked reply template usage and case closing efficiency
- Handled general user inquiries, analyzed and discovered new bugs. Documented all findings to enrich team knowledge
- Applied and tested for release update

Frontend Developer Intern
Nov 2021 – Apr 2022
Blokbot, London

- Updated company's React-Next-Typescript homepage interface regularly, discussed implementation with web designer
- Pair-programmed a new user dashboard visualizing live crypto market data, trading bot performance, and customer portfolio
- Participated on user management services migration, created proof-of-concept report analyzing JWT, Auth0 and AWS Cognito

District Councilor
Jan 2020 – May 2021
Eastern District Council, Hong Kong

- Founded the pandemic support program and facilitated cross-government collaboration. Vetting task force expenses to ensure fair use of council budget.
- Engaged community stakeholders through themed activities such as cyclist gathering or school drama for elderly home. Strengthened neighbourhood ties and gathered first hand opinions.
- Advised on council's public facilities improvement projects, revamping youth center, sport ground, and roads
